Languages

Hindi, English, Chinese (Basic)

OBJECTIVE

Hello there! I am Anjali, an Enthusiastic and driven BCA student in the 5th semester with a strong interest in software development. Seeking internship opportunities to apply theoretical knowledge and technical skills in a dynamic Software Engineer role.

Relevant Coursework

- Object-Oriented Programming
- Data Structures and Algorithms
- Database Management Systems
- System Analysis and Design
- Web Development

SKILLS

- **Programming Languages:** C, C++, Python, Java, Kotlin
- **Web Development:** HTML, CSS, JavaScript
- **Database Management:** SQL
- **Tools & Technologies:** Photoshop, Git, Visual Studio Code, IntelliJ Idea, PyCharm and Arduino
- **Problem-Solving Skills:** Analytical thinking, Creative problem-solving
- **Communication Skills:** Excellent written and verbal communication

Resume Anjali

Education

- 10th passed from CBSE Board (86%)
- 12th passed from CBSE Board (80%)
- Indira Gandhi University, New Delhi
- Bachelor of Computer Applications (BCA)
- Expected Graduation: June 2025
- Pursuing a Diploma in programming languages through Expert academy

Projects

1. Portfolio Website:

Designed and built a responsive and user-friendly website showcasing skills, academic projects and resume. development techniques including HTML5, CSS3, and JavaScript for enhanced user experience. Explore my professional journey, featured projects, and insights into emerging technologies in software development.

2. Simple Notepad using Java Swing:

Created a Simple Notepad is a basic text editor with a user-friendly interface, allowing users to create, open, save, print, and edit text files. It supports text formatting, dark theme viewing, zoom, and displays status. Additionally, it offers shortcut keys and a recent files option for enhanced convenience.

3. Simple Mp3 music player using java swing:

Created a simple MP3 player application. It provides basic controls to play, pause, resume and stop MP3 audio files.

4. Arduino:

- **Flame Detector:** Developed a fire detection system using Arduino IR sensor, and LED. Implemented real-time monitoring and alert mechanisms for safety purposes.
- **Pulse Sensor:** Created a heart rate monitoring application using Arduino and a pulse sensor. Processed bio-signals to calculate and display beats per minute (BPM) on a Serial Monitor.
- **Social Distance Detector:** Designed a social distancing alert system using Arduino and ultrasonic sensors. Configured LED alert to ensure safe distancing. Here you can visit my projects: <https://github.com/akvr000/Projects>
